## EFRÎN

Efrîn is a district as well as a city that is 40 Kilometers to the North West of Aleppo, and it has become part of self-autonomous rule since its establishment in 2012. Later it became part of the Democratic Federation of Northern Syria, declared in 2016.

The region's population was nearly 500,000 before 2011. It is comprised of many towns and circa 380 vilages. After 2011 and due to massive military operations between the regime and the opposition in nearby Idlib and Northern Aleppo suburbs, in addition to the fall of opposition-controlled areas in Aleppo city to the regime in December 2016, the area was considered as a safe haven for Internally Displaced Persons (IDPs) from many areas all over Syria. The number of IDPs is roughly 250,000, in addition to many families from the region who used to live in Aleppo before 2011. The current unconfirmed number of the civilians in Efrîn region is around 800,000 people including IDPs.

1

Despite many battles between the SDF that control the area, and some Islamist groups (including AQ's Nusra front) and other armed groups, the SDF maintained its control over the region since it took over in 2012.

## **EFRÎN SITUATION**

The Turkish state and some islamist groups have started a military attack on the 20th of January 2018 with an intensive bombardment by Turkish warplanes targeting military sites and civil ordinations in Efrîn.

Major attacks from the border with Turkey, starting from Turkey's soil, are targeting the Northern, Eastern and Western areas of Efrîn region, causing massive displacement within the region and many civilian casualties according to UN; until now more than 16.000 have been dispalced since 20.1.2018

Due to the bombardments, humanitarian vialations on civillians and displacements the area is facing a humanitarian crisis and disaster.

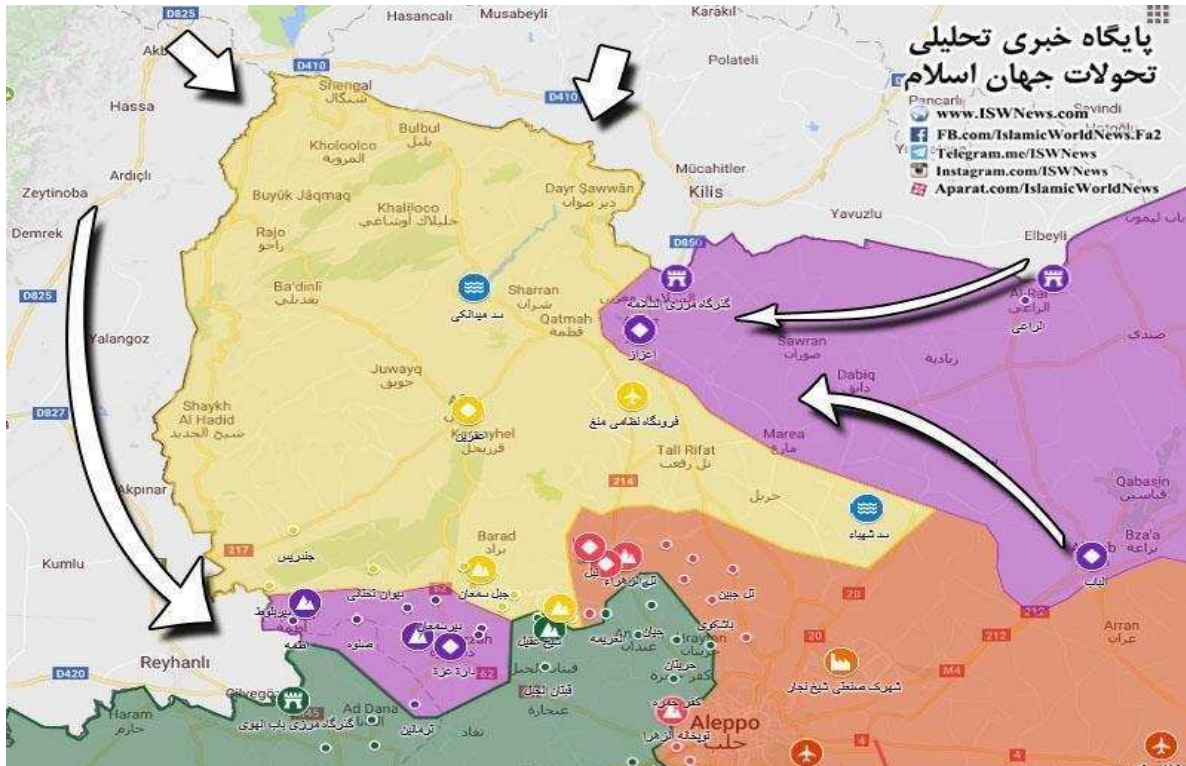

There are grave concerns for the civilians who are in the remote areas and who lack access to healthcare, shelter and food.

The Turkish military attack does not only target Efrin, but they also target the Kobanê and Cizîrê cantons.

2

SDF spokesman in 1.2.2018 has declared that in the period between 26.1.2018 until 1.2.2018;

- their forces have been fighting with Turkey and its allies inside Efrin more than 250 times
- More than 1893 rocket came inside Efrin from Turkey
- Turkey used internationally forbidden weapon.

**In 2.2.2018 Heyva Sor a Kurd Medical team in Rajo has reported a **suspension of Chemical attack**:**

3

At 3:45 p.m. 5 asayish forces in name of (Abduletif Ibrahim 32 years old- Ahmed Husni Abdo 37 years old- Melaz Alafo 22 years old – Mamo Jemo 30 years old) came to the trauma stabilization point of KRC with symptoms of (Nausea- vomiting- difficulties in Breathing- partially unconscious) . Those five asayishes were protected inside a cave, and a rocket targeted the front side of the cave after they were protected inside.

KRC team who registered those cases has been trained in the chemical response in Raqqa battle for such attack, based on WHO standards and in project under Echo support in Raqqa governorate. The team could not analyze the situation very well according to the team leader Jamila Hame, but they get the PPE anyway for protection and decontamination procedures.

The fear of a chemical attack stems from the fact that the Turkish state considers the Kurdish forces in Syria as part of PKK, and before now Turkey in many periods used Chemical weapons against PKK in Turkey.

The Asayish forces group those were in a cave in Rajo , they came to KRC casualty collection point with symptoms of nausea, vomiting, and difficulties in breathing

## THE CAUSES OF IMMIGRATING TO EFRÎN PROVINCE

Efrîn is located in the northwestern corner of Syria, and it is 60 Km away from the Aleppo province. Immigration to the province began since the beginning of the crisis in 2011 because of the clashes between the Syrian regime and the free army. With the intensification of the conflict, the influx of refugees to the province increased to more than 300,000 IDPs from various Syrian regions near Efrîn (such as Aleppo, Hamma, Al-Raqqa, Idlib, Kobani, Izaz, Al-Tabqqa, Ihzer, Tel Hasel, Tel Aaran, Kefr Naya) and other regions.

IDPs distributed to the villages, cities of Efrîn and the shelters as follows:

- in the province center: 143505 IDPs.
- in Sherawa area: 76005 IDPs.
- in Jendres area: 43510 IDPs.
- in Rajo area: 6970 IDPs.
- in Shran area: 10105 IDPs.
- in Shekh Al-Hadid area: 780 IDPs.
- in Bilbil area: 1645 IDPs.
- in Maabtli area: 2207 IDPs.

The total number of the registered IDPs are **284,727**.

One of the most important reasons that led people to move to the province is the security and peace in Efrîn and the relatively easy access to Efrîn, albeit being in proximity to the area of conflict.

Efrîn has been a region in which predominantly Kurds were living. Since the start of the war it has become a mosaic of ethnic/religious diversity as refugees from many neighboring cities have turned to the region for aid. The self-administration helped facilitate the entry of IDPs into the

province. This has led the IDPs to integrate into society and lead a normal life without discrimination.

After a significant increase in IDPs numbers the self-administration has decided to create Rubar camp near Al-Basela village in Al-Sherawa area. However, the continuation of the Syrian crisis and the attacks of the Turkish state has increased the rate of immigration to the camp. Because the capacity to take in IDPs had to be increase, it was necessary to quickly initiate the establishment of Al-Shahba camp near Kashtar village in the Sherawa area.

### **About Rubar Camp:**

Rubar camp is located in the east of the Efrîn canton, about 25 kilometers away from the center of Efrîn city. The camp was finally established on 27/9/2014 with a preliminary capacity of 100 tents, providing 575 families a safe place for the Syrian refugees fleeing from the death specter around the conflict area (f.e. Tel Refaat, Maraa, Shekh Issa, Babis, Al-bab, izaz, Kefr Naseh, Aleppo and its western countryside, Al-Qunitera, Hamma, Humus, Al-Tabqqa, Idlib and Damascus countryside).

Unfortunately the Turkish state has purposefully attacked the camp with missiles more than once, and the children of the camp came out objecting to the bombing on 30/7/2017. On 18/1/2018 the camp was hit by shrapnel which came from Turkish invaded territory. As a result, at least seven families left the camp for fear of their lives, being yet again running from war.

### About Al-Shahba Camp:

The camp is located on the southeast of Efrîn, about 25 Km away from it. The self-administration has established this camp on 14/7/2016 after the Turkish state attacks on the northern Aleppo countryside. The clashes continue around the camp between the opposition and ISIS.

The camp capacity reached 270 tents inhabited by 273 families. The migrant families living here came from several areas (such as Harbl, Al-Shekh Issa, Im Hush, Al-Wrdia, Tel Mksour, Al-Shahba's dam areas, Al-Bab, Menbeg, Izaz, Al-Raqqa and Al-Tabqqa). Many other IDPs/immigrants distributed to the cities and villages of Efrîn.

## HUMANITARIAN SITUATION IN EFRÎN

*Photo showing Kurdish Red Crescent rescue teams trying to evacuate a child stuck under wreckage after warplanes attacked a poultry farm near the village of Anabke in Efrîn suburbs where IDPs were taking shelter, this attack led to many deaths amongst civilians / 21 January 2018*

*Cilbirê village / 28 January 2018*

*Civilians live in Basements and Caves in the Jinderes district area in Efrin, they are suffering of lack of water, food, electricity and basic health services Cindirêse - Hemame Village - 27 Jan 2018*

*Destruction of civilian houses in Jinderes town in Efrin suburbs / 24 January 2018*

*Civilian who was evacuating his family after being he treated his uncle in (Rajo) in KRC Casualty colectiv point. During transporting the familly to Efrin Hosputal, their car was targeted and as a reasult he lost his are, the auncle and his wife lost their legs .*

*A mother in the Rajo area lost her legs on January 30, 2018 due to a Turkish air strik.  
She was transported to Avrîn Hospital.*

## Victims in the period 20.1.2018 until 29.1.2018

Children: wounded(27), dead (22)

## **HEYVA SOR A KURD**

Heyva Sor a Kurd (the Kurdish Red Crescent) is aiming to organise aid and support for people of Efrîn. Under the actual urgent situation, the only organisation providing humanitarian aid in Efrîn is our institution.

Heyva Sor a Kurd is a Kurdish institution carrying out humanitarian aid activities in light of universal values and principles with the aim of providing help to anyone who suffers war, disaster and poverty regardless of their ethnicity, religion and political preferences.

At the moment we are aiding the civilians who suffered the bombardment of invasive Turkish war planes and artilleries. We are transferring the wounded civilians from the war zone to available hospitals and medical centres.

### **Needs**

21

- Medical drugs, emergency drugs and medical supplies for ambulances,
- Ambulances,
- Food supplies,
- Winter clothes,
- Dairy products for babies and children.

### **URGENT APPEAL:**

International solidarity is needed more than ever to bring the current humanitarian disaster in Efrîn to a halt. We are inviting international organizations and actors to support Efrîn today.

We appeal to the silence of the international society against the invasion of Efrîn by Turkish forces and we expect the international society to put pressure on Turkey to stop its aggression against Efrîn region and to stop the violation of the Syrian sovereignty.
