There was 1 strike (RTF Strike # (b)(1)1.4a) in the vicinity of Mosul on 22 April 2016. The strike targeted Objective (b)(6) traveling in a dynamic vehicle in Mosul. The strike was taken in favorable conditions when no civilians were in the vicinity. Post-strike imagery from ISR FMV showed no collateral damage from the strike. However, because the post-strike imagery is zoomed in so close to the target, the (b)(1)1.4a Geospatial Exploitation Team was consulted to review the ISR FMV to further assess the BDA. It was determined that this strike did not result in any collateral damage or CIVCAS. Task Force 94-7 has determined that this reported CIVCAS allegation is not credible.
